

[illegible]

The diagram shows three vertically aligned signals over time t . The top signal, VL , consists of two pulses labeled 91 and 92. The middle signal, S , has a pulse labeled OP . The bottom signal, CRK , has a pulse labeled CL . Vertical dashed lines connect the peaks of the VL pulses to the S and CRK pulses. A horizontal dashed line indicates the time interval t_{INJ_S} between the start of the CL pulse and the start of the OP pulse.
